

Divyanshu Kumar

Ramgarh, Jharkhand, IN — +91 7970479325
work.kumardivyanshu@gmail.com — LinkedIn — GitHub — Portfolio

Summary

Associate Software Engineer skilled in C++, Python, and SQL with strong foundations in Data Structures, Algorithms, Operating Systems, and Database Systems. Experienced in building scalable applications, REST APIs, and distributed systems with microcontroller integration. Solved 250+ coding problems, showcasing strong problem-solving ability.

Skills

Languages: C++, Python, C, SQL

Core CS: Data Structures, Algorithms, Operating Systems, DBMS, Networking

Software Engineering: REST APIs, Flask, Microservices, Docker, ESP-NOW

Tools: Git, Linux, Jupyter, Streamlit, NodeMCU

Additional: Computer Vision, Machine Learning (Regression, Classification, Neural Networks)

Experience

Data Science Intern Feb 2025 – Apr 2025

TechInterex (Remote)

- Delivered 5+ projects including fake news detection (95% accuracy) and churn prediction (94%).
- Improved pipelines and automated model evaluation using F1-score and ROC-AUC.

AI Intern Nov 2024 – Jan 2025

Gyantu (Remote)

- Built a chatbot using LLaMA 3.2, LangChain, and ChromaDB with Streamlit-based UI.
- Designed back-end APIs for real-time responses, improving scalability and reliability.

App Developer Trainee Nov 2023 – Dec 2023

Lawazia Tech (Remote)

- Developed a blog app with authentication, dark/light mode, and responsive design.
- Optimized code structure and navigation, improving performance by 30%.

Projects

Driver Monitoring System (AI-Powered) Jan 2025 – May 2025

GitHub

- Developed a system for the detection of drowsiness, mood, and road rage with real-time video analysis.
- Implemented distributed communication between Flask APIs and NodeMCU.

Smart Vision Quality Control System Jan 2025

GitHub

- Automated conveyor-based food testing with YOLOv8, OCR, and freshness detection.
- Integrated NodeMCU with IR sensors for real-time system control.

Unified Customer Insights (HackFest'24 Finalist) May 2024

GitHub

- Built churn prediction system using customer activity and sentiment features.
- Designed ETL pipeline and dashboards for visualization of insights.

Education

B.Tech in Computer Science and Engineering (CGPA: 8.5) 2021–2025

Dumka Engineering College, Jharkhand

Relevant Coursework: Data Structures, Algorithms, Operating Systems, DBMS, AI

Achievements

- Winner – Innovathon (BIT Sindri) – Smart Vision AI System
- Finalist – HackFest'24 (IIT ISM Dhanbad) – Customer Churn Project
- Ranked Top 3 in Computer Science Department
- Solved 250+ DSA problems on LeetCode and GeeksforGeeks
